

## **Proposition for Assignment**

The COVID-19 pandemic situation makes us confused on several issues. How to use PPE by doctors a good procedure is produced by the Government of Bangladesh as shown in Appendix A. However, one of the issues is “COVID-19 sterilization and prevention of subsequent infection”. Government of Bangladesh issued a standard operating procedure on this issue (StandardOperatingProcedure.pdf).

For the final examination, the assignment is to develop a detail guideline for a multimedia product which will give the hospital authority a thorough understanding of “COVID-19 sterilization and prevention of subsequent infection”.

You have to prepare

1. Which type of font you will use for which area of your presentation along with your detailed explanation.
2. What type of graphics you will use after explaining the utility of the graphics for this purpose
3. How the image will help to produce multimedia products for consumption of Hospital authority.
4. What will be your idea on the role of audio in preparing this multimedia product?
5. Develop a storyboard for the animation you will use for the animation.
6. Produce a realistic Ganttchart for producing a successful multimedia product for the hospital authority.

Use your all the technology you know. The final multimedia product will be in Bangle only.
